

Anti mouse *Sall4* mouse monoclonal antibody

Sall4: sal-like 4

Code No	PP-PPZ0601-00	Application / Recommended Concentration	In order to obtain the best results, optimal working dilutions should be determined by each individual user.
Clone No.	PPZ0601	Western Blot	Decide by use
Lot.	A-2	Non reducing Western Blot	Not yet tested
Concentration	1 mg/mL	ELISA	Decide by use
Volume	100 uL	Immunoprecipitation	Decide by use
Ig Class	G2a	Supershift Assay	Not yet tested
Description	The <i>spalt (sal)</i> genes encodes proteins characterized by multiple double zinc-finger motifs of C2H2 type, which were first found in <i>Drosophila</i> . Mutations in <i>SALL4</i> which is one of sal-related genes in human cause an autosomal disorder known as Okihiro syndrome. The mouse homolog of Sall4 is essential for early embryogenesis and for the proliferation of ES cells.	Chromatin immunoprecipitation	Not yet tested
Genbank	NM_175303	Immunohistochemistry	Decide by use
Origin	Produced in BALB/c mouse ascites after inoculation with hybridoma of mouse myeloma cells (NS-1) and spleen cells derived from a BALB/c mouse immunized with Baculovirus-expressed recombinant mouse Sall4 (95-216 aa) .	Storage	Store at 2 - 8 °C up to one month. For long-term storage, the solution may be frozen in working aliquots. Repeated freezing and thawing is not recommended. Storage in a frost-free freezer is not recommended.
Epitope		Reference	Sakaki-Yumoto M, <i>et al.</i> , Development, 133(15): 3005-13, 2006.
Specificity	This antibody specifically recognizes mouse Sall4. Not yet tested in other species, including human.	Notes	Sodium azide may react with lead and copper plumbing to form explosive metal azides. Flush with large amounts of water during disposal.
Purification	Ammonium sulfate fractionation.		
Formulation	Physiologic saline with 0.1 % NaN ₃ .		

FOR RESEARCH ONLY. NOT FOR USE IN HUMANS.

Not for Diagnostic or Therapeutic use.
